

# HOW TO SET A TIMER ON ALEXA

Say “Alexa, set a timer for 5 minutes”  
– or however long you want

Alexa will say “timer for 5 minutes,  
starting now”

Alexa will beep when the time is up

Say “Alexa, stop” to stop the beeping

Alexa is awake and listening when a blue line glows on the device. Any conversation or noise is recorded and can be viewed later on the mobile phone used to set up your Alexa device. You can easily delete this record by going to the Alexa app on this mobile phone. This will also delete the record on the Alexa server which is owned by Amazon.
